

FREE GUIDE

AI for Customer Service

Answer faster, never miss a lead, and free your team,
with AI-assisted support and WhatsApp flows that feel
personal.

WHERE AI HELPS

Four ways AI lifts your support

Good service is fast, consistent, and always on. AI handles the repetitive 80% so your team can give real attention to the 20% that needs it.

1 **Instant replies, 24/7**

An AI assistant answers common questions immediately, day or night, on your website and WhatsApp, so customers never wait.

2 **Smart triage**

Messages are read, summarised, and routed to the right person with priority flags, so urgent issues never get buried.

3 **Draft-ready responses**

For anything needing a human, AI writes a ready-to-send draft using your past replies and knowledge base, your team just reviews and sends.

4 **Never miss a lead**

Sales questions hidden in support chats get spotted and routed to your team, turning service into revenue.

DO IT RIGHT

How to roll it out safely

- ✓ **Feed it your real answers.** The assistant should learn from your FAQs, past chats, and policies, not guess.
- ✓ **Keep a human in the loop.** Let AI handle the routine and hand off anything sensitive or unusual to a person.
- ✓ **Set clear boundaries.** Define what it can and can't promise, refunds, pricing, timelines, so it never oversteps.
- ✓ **Stay on-brand.** Match your tone and language (including Arabic), so replies sound like you.
- ✓ **Review and improve weekly.** Check transcripts, fix gaps, and the system gets sharper over time.

THE PAYOFF

Businesses that automate first-response typically cut reply times from hours to seconds and free their team from a large share of repetitive tickets, without sacrificing the personal touch on what matters.

Give every customer a fast answer.

Book a free 30-minute call and we'll design an AI support flow for your business, web and WhatsApp included.
