THE ENGINE

The four-stage lead engine

Reliable lead-gen isn't one clever tactic, it's a system where each stage feeds the next. AI makes every stage faster and cheaper to run.

1 Source

Build a clean, targeted list of the right businesses or buyers, enriched with the details you need to personalise, automatically pulled and verified.

2 Reach out

Send personalised messages at scale across email, LinkedIn, or WhatsApp, with AI writing the relevant opening line for each prospect, not a generic blast.

3 Qualify

An AI assistant handles replies, answers basic questions, and scores intent, so only genuinely interested leads reach a human.

4 Book

Hot leads are routed straight to your calendar with reminders, while warm ones drop into a nurture sequence until they're ready.

MAKE IT CONVERT

What separates a system that works

- ✓ **Relevance over volume.** 200 well-targeted, personalised messages beat 5,000 generic ones, every time.
- ✓ **Speed to lead.** Reply in minutes, not hours. AI handles the instant first response around the clock.
- ✓ **Follow-up persistence.** Most replies come after the 3rd touch. Automate the sequence so it always happens.
- ✓ **One source of truth.** Every lead, message, and status lives in one CRM so nothing slips through.
- ✓ **Measure and tune.** Track reply rate, booking rate, and cost per call, then double down on what works.

A REALISTIC BENCHMARK

A well-run AI outbound system commonly lands a 5–15% positive reply rate, several times typical cold benchmarks, because every message is relevant and every follow-up actually happens.

The hard part isn't the tools, it's wiring them together so the whole engine runs reliably without you babysitting it. That's exactly what we build.

Let's fill your pipeline.

Book a free 30-minute call and we'll map an AI lead engine for your business, from list to booked call.
